

## GREEN STATEMENT

As the responsible owner of Sungate Holiday Apartments, I have a moral commitment to the environment shared by my staff.

**“We aim to continue with simple ideas, make them work, build upon success, and to improve further.”**

We are trying to minimise our carbon footprint by recycling, re-using, conserving water and energy, reducing carbon miles by supporting local businesses, and by avoiding extra car miles whenever possible.

Sungate’s laundry water is heated partly by solar panels on the roof.

In 2009/10 our landfill waste was reduced further by recycling.  
We aim to reduce it more as recycling facilities improve.

We are continuing to change to more energy-efficient TVs and heaters that consume energy at half the previous rate. We would appreciate Guests switching off the stand-by lights when they are not in use.

**I hope my guests will work with us so we can do our bit to conserve our planet.**

Your ideas on how to improve this aim further will be gratefully received.
